

First of all, you need a SBus receiver, the pic below is the whole system

I use channel 7 for example

Channel	Percentage	Function	Destination
CH1	100%	Ail	AiIR
CH2	100%	Ele	Elev
CH3	100%	Thr	Motor
CH4	100%	Rud	Rudder
CH5	100%	SF	
CH6	100%	SE	
CH7	100%	SG	
CH8	100%	SD	
CH9			

A switch on the controller

The switcher should be at middle at default, if you pull it up, it triggers the recording, the blue light on the cam blink.
